

# CANTHO

Thiifluzamide 24% SC

Cantho is an advanced fungicide to control sheath blight in rice. It is a systemic fungicide that controls sheath blight effectively.

## Features:

- ➔ has preventive as well as curative action
- ➔ has excellent rainfastness
- ➔ gives phyto-tonic effect to crop
- ➔ improves the immunity power of the plant

**Available SKUs:** 1 L, 500 ML, 150 ML

## Benefits:

effective control  
of sheath blight

fast action on  
sheath blight

long-lasting  
control

improves quality  
and grain yield

crop	target disease	dose/acre
rice	sheath blight	150 ML

**Antidote:** Empty stomach by gastric lavage with milk or preferably solution of potassium ferrocyanide. Administer egg white and other demulcents. Maintain electrolyte and fluid balance. Morphine and Pethidine may be given to control pain. If symptoms persists, give dimercaprol or penicillamine. Penicillamine may be given in the dose of 10-40 mg/kg/day (maximum 1-2 gm/day divided into four doses) for five days. Dimercaprol is given in the dose of 3 mg/kg every four hours for first four days and 2 mg/kg every 12 hours for a total of 10 days by intravenous route. Give within first four hours as per poisoning to obtain maximum benefit.
