

# CROLIS

Pyriproxyfen 5% + Diafenthiuron 25% SE

Crolis is a systemic insecticide that provides effective control against all stages of whiteflies with suppression of other sucking pest complex in cotton.

## Features:

- ➔ Novel SE formulation helps in faster action and has excellent rainfastness; does not wash easily from the plant's surface
- ➔ translaminar activity helps in effective control of whiteflies feeding below the leaf
- ➔ relatively environment friendly and safe for user (when used as recommended under standard conditions)

**Available SKUs:** 1 L, 500 ML, 250 ML, 100 ML

## Benefits:

safe for crop

easy to apply and  
safe for user

safe for beneficial  
insects and mammals

long-lasting  
IGR action

crop	target pests	dose/acre
