

IRIO

Pyrazosulfuron ethyl 10% WP

Irio is one of the most effective herbicides for controlling annual and perennial grasses, broadleaf and sedges in paddy crop.

Features:

- ➔ provides broad-spectrum weed control in nurseries as well as main fields
- ➔ effective for the control of various weeds on paddy, especially broadleaf weeds and sedges
- ➔ brings greenery in paddy field
- ➔ safe for paddy seedling
- ➔ absorbs through roots and leaves of weeds due to systemic mode of action and ensures good control of weeds

Available SKUs: 80 g, 20 g

crop	target weeds	dose/acre
transplanted rice	<i>Cyperus difformis</i> , <i>Cyperus Iria</i> , <i>Fimbristylis miliacea</i> , <i>Monochoria vaginalis</i> , <i>Ludwigia parviflora</i>	40-60 ML

Antidote: No specific antidote. Treat symptomatically.
