

MELINA

Fenoxaprop-p-ethyl 9.3% EC

Melina is a selective post-emergence herbicide used to control narrow leaf weeds in soybean, paddy, black gram and cotton crops.

Features:

- ➔ very flexible as far as time of application is concerned
- ➔ gives a high level of control against most annual grassy weeds from the two-leaf to mid-tillering stage at low dosages
- ➔ a versatile herbicide that can be used in prescribed crops
- ➔ safe for succeeding crops
- ➔ taken up via green plant tissues of the weed and not via roots, hence it works independent of the soil type

Available SKUs: 1 L, 500 ML, 250 ML, 100 ML

crop	target weeds	dose/acre
soybean	<i>Brachiaria spp.</i> , <i>Digitaria spp.</i> , <i>Echinochloa spp.</i> , <i>Eleusine indica</i> , <i>Setaria spp.</i>	400 ML

Antidote: No specific antidote. Treat symptomatically.
