

MONIL GR

Fipronil 0.3% GR

Monil Gr is a broad-spectrum insecticide of phenyl pyrazole group that effectively controls insects by its systemic action.

Features:

- ➔ a broad-spectrum insecticide with contact and stomach action
- ➔ easy-to-use granular formulation that can be easily broadcasted on the standing crop
- ➔ acts as plant growth regulator, which enhances the root growth and results in higher yields
- ➔ ideal insecticide for the integrated pest management (IPM) system

Available SKUs: 5 kg

Benefits:

broad-spectrum control

long-lasting control

safe to beneficial insects

great IPM fit

crops	target pests	dose/acre
rice	stem borer	7 kg
