

# PRABHAVI

**Azoxystrobin 18.2% + Difenoconazole 11.4% SC**

Prabhavi is a combination fungicide of azole and strobilurin group for the control of multiple diseases.

### Features:

- ➔ an ecofriendly suspension concentrate formulation
- ➔ systemic fungicide with preventive and curative activity
- ➔ rapidly absorbed into plants with even distribution ensuring total protection to leaf surface
- ➔ exhibits novel two-way mode of action with in-built anti-resistance activity
- ➔ effective against all four major classes of fungus

**Available SKUs:** 1 L, 500 ML, 200 ML, 100 ML

### Benefits:

effective control of wide range of diseases

flexibility in application time at different stages of crop

reliable field performance with effective disease resistance management

healthy crop and better grain quality

crops	target diseases	dose/acre
rice	sheath blight	200 ML
chilli	anthracnose, powdery mildew	200 ML
tomato	early blight, late blight	200 ML
cotton	grey mildew, leaf spot	200 ML
onion	blight, downy mildew, purple blotch	200 ML
sugarcane	red rot, rust, smut	160 ML
wheat	powdery mildew, rust	200 ML

**Antidote:** No specific antidote. Treat symptomatically.
