

# SATRIX

Imazethapyr 10% SL

Satrix is a herbicide of the imidazolinone group used as an early post-emergence herbicide to control selective broadleaf and grassy weeds in soybean and groundnut.

**Features:**

- ➔ a systemic herbicide, absorbed by the roots and foliage with translocation in the xylem and phloem accumulation in the meristematic regions
- ➔ controls many grasses, broadleaf weeds and sedges
- ➔ residual action on the weeds gives longer weed control
- ➔ safe for subsequent crops

**Available SKUs:** 1 L, 500 ML, 250 ML

crops	target weeds	dose/acre
soybean	<i>Commelina benghalensis</i> , <i>Croton sparsiflorus</i> , <i>Cyperus difformis</i> , <i>Digera arvensis</i> , <i>Echinochloa spp.</i> , <i>Euphorbia hirta</i>	400 ML
groundnut	<i>Commelina benghalensis</i> , <i>Cyperus difformis</i> , <i>Eragrostis pilosa</i> , <i>Trianthema portulacastrum</i>	400 ML

**Antidote:** No specific antidote. Treat symptomatically. Call the physician if needed.
