

SPORA

Thiamethoxam 25% WG

Spora is a broad-spectrum systemic insecticide used to control a wide range of sucking insect.

Features:

- ➔ faster action – readily absorbed and trans-located in plant tissues
- ➔ broad-spectrum control – controls a wide range of sucking insects in various crops
- ➔ fast emergence, good plant stand and increases root mass
- ➔ excellent vigour – increased foliage and canopy
- ➔ phytotonic effect – taller and greener plants
