

VILLO

Sulphur 80% WDG

Villo is a broad-spectrum contact and protective fungicide. It also provides sulphur, which is the fourth essential plant nutrient.

Features:

- ➔ a dust free, flowable micronised granules having greater sticking power and persistence ensures protection for longer duration and thus requires less sprays
- ➔ has instant dispersion and high suspensability in water; therefore, it does not cause scorching
- ➔ has triple action as fungicide, micronutrient (sulphur) and miticide
- ➔ ensures immediate control of diseases and checks damage to crop

Available SKUs: 25kg, 5 kg, 3 kg, 1 kg, 500 g

Benefits:

increase yield

crop growth

healthy soil

crop protection

crops	target disease	dose/acre
apple, cowpea, cumin, grape, guar, mango, pea	powdery mildew	750-1000 g

Antidote: No specific antidote. Treat symptomatically.
